

Ashish Kumar

Software Development Engineer in Test II (SDET II)

Bangalore, India · ak1545861@gmail.com · [linkedin.com/in/as9670](https://www.linkedin.com/in/as9670) · github.com/Ashishk9670

SDET with 5+ years designing scalable UI and API automation frameworks for web and mobile applications across healthcare and fintech. Strong expertise in Playwright, Selenium, API testing, CI/CD, and performance testing. I use AI-assisted tooling to move faster without cutting corners, and I treat accessibility as a first-class engineering requirement, not an afterthought.

EXPERIENCE

Software Development Engineer in Test II (SDET II) — Triomics Healthcare

Jun 2026 – Present

- Authored the automation suite from scratch for an oncology clinical-trial matching platform, in a HIPAA-regulated environment.

Software Development Engineer in Test II (SDET II) — LiveSwitch

Sep 2024 – Mar 2026

- Designed and owned scalable UI and API automation frameworks using Selenium, TestNG, REST Assured, Appium, and BDD (Cucumber) across Chrome, Safari, Edge, Firefox, and Android/iOS.
- Built Playwright test suites from scratch for new workflows, enabling early regression coverage and reducing production defects.
- Authored feature-level test plans and detailed test cases for comprehensive coverage.
- Optimized test execution strategy, cutting regression execution time by ~40%.
- Validated API responses and backend data consistency using SQL queries and schema validation.
- Integrated automated test suites into CI/CD pipelines (GitHub Actions, Jenkins).
- Applied AI-powered coding agents (Claude Code, Cursor, MCP Server) to generate test cases, debug automation failures, and streamline manual and automated testing workflows.
- Performed API load and performance testing with JMeter to identify bottlenecks and ensure system stability.

Software Development Engineer, Quality — Mastercard Data & Services

Jul 2021 – Sep 2024

- Led end-to-end testing for a commercial payments rewards platform supporting large-scale transaction workflows.
- Collaborated with Product Managers and developers to define feature-level test strategies.
- Built and maintained 1000+ automated test cases using Cypress (JavaScript) and Selenium, achieving 95%+ test coverage across multiple releases.
- Improved defect resolution speed by ~20% by initiating structured QA-Dev syncs and better triaging practices.
- Worked in Agile (Scrum) teams with CI/CD-driven delivery pipelines supporting high-volume commercial payments workflows.

SKILLS

Languages: Java, TypeScript, JavaScript, C++

Test Automation: Playwright, Selenium, Cypress, TestNG, Appium, REST Assured, Cucumber

Testing Disciplines: UI Testing, API Testing, Regression, Smoke Testing, Performance (JMeter), Load Testing (k6), Contract Testing (Pact), UAT, Integration Testing, Cross-Browser Testing, E2E Testing, Chaos Testing, Accessibility (WCAG), Internationalization (i18n)

Platforms: Web, Android, iOS, macOS, Windows

CI/CD & Cloud: GitHub Actions, Jenkins, Azure DevOps, Docker, AWS

Data & Observability: MySQL, PostgreSQL, MongoDB, Redis, Sentry

Version Control & PM: Git, Bitbucket, Jira, TestRail

AI-Assisted Development: Claude Code, Cursor, GitHub Copilot, MCP Server, ChatGPT

EDUCATION

National Institute of Technology, Warangal
Bachelor of Technology · 8.69 CGPA · 2017–2021

CERTIFICATIONS

Cypress End-to-End JavaScript Testing
HackerRank – Problem Solving
